EC2 Windows lab

Dr Peadar Grant

September 23, 2021

1 Prerequisities

This week's lab assumes that you:

- Can use the AWS CLI (by getting credentials from AWS Educate for it)

- Can run Powershell scripts to setup your environment

- Have deleted LAB_VPC if it exists.

- Have gone through the Linux lab from last week (as we will mainly focus on the differences)

2 Lab task

2.1 Instance setup

Set up a Windows EC2 instance following the steps in the lecture notes.

Confirm that you can connect using RDP.

2.2 SSH server setup

Set up the SSH server following the instructions in the lecture notes.
